

A detailed technical line drawing of a mechanical device, possibly a pump or engine component, shown in a side profile. The device features a central vertical shaft with a horizontal handle or lever at the top. Below the handle, there are several cylindrical components, including what appears to be a piston or valve mechanism. To the left of the main body is a large, rectangular component, possibly a motor or a housing. To the right, there is a smaller, more complex assembly with various ports and valves. The entire device is mounted on a base with two small, rectangular feet. The drawing is a black and white line art, typical of technical manuals.
