Stainless steel

P.28

## Application Icon list

The standard configuration for pump systems with those with an output of 0.75 kW or more are equipped with a Premium efficiency motor (IE3 efficiency), and those with an output of 0.4 kW or less are equipped with a standard efficiency motor. Please consult your distributor for the motor specifications.

## Application

(Please inquire in case drinking water application)

## Features

- Compact and light weight
- Easy maintenance and inspection due to back pull out construction
- Long life mechanical seal is adopted for shaft sealing
- Evaluated item of <Horizontal centrifugal pump> by (C) Public Buildings Association, Ltd. (in Japan)

## Standard specifications

- |                 |   |
|-----------------|---|
| • Liquid        | Clean water 0~90°C (there should be no freezing)                      |
| • Materials     | Impeller: Cast iron or Bronze<br>Shaft : SUS304<br>Casing : Cast iron |
| • Shaft sealing | Mechanical seal (Ceramic × Carbon)                                    |
| • Motor         | TEFC outdoor  |
| • Flange        | JIS 10K Standard type   |

## Maximum back pressure

(1-Zero-discharge head of pump) MPa

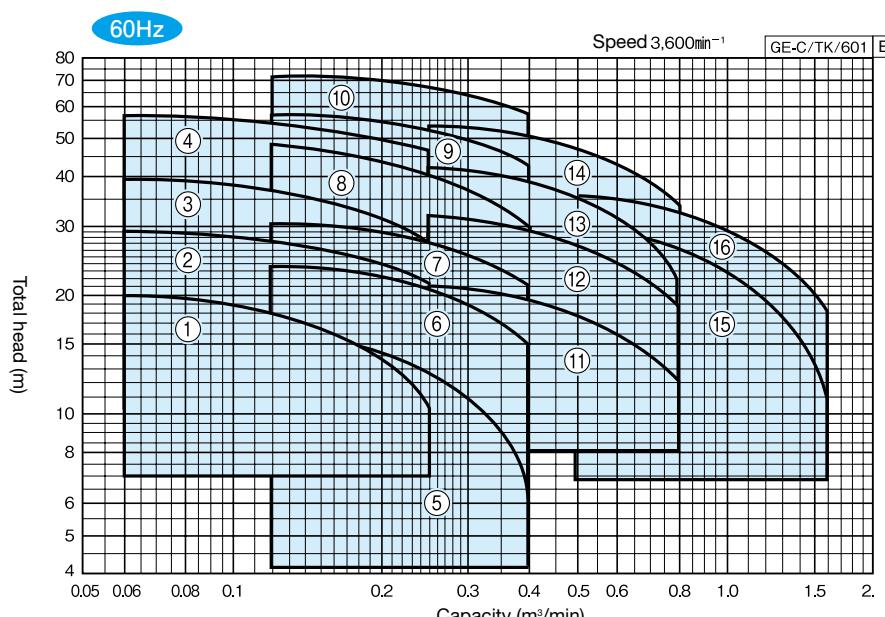

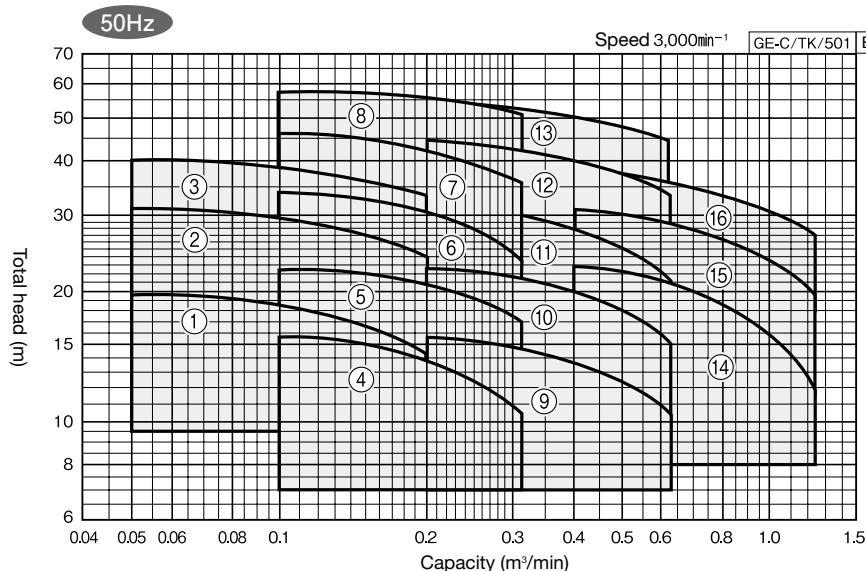

## Maximum suction total head (20°C)

-6 m (-3.2 m : GEH506CE0.75  
-5.5 m : GEI806CE5.5,7.5)

## Standard accessories

Motor, Base

GE-C/Hd/600 E

# GE-2M Type Centrifugal pump

2 pole

## Application

(Please inquire in case drinking water application)

## Features

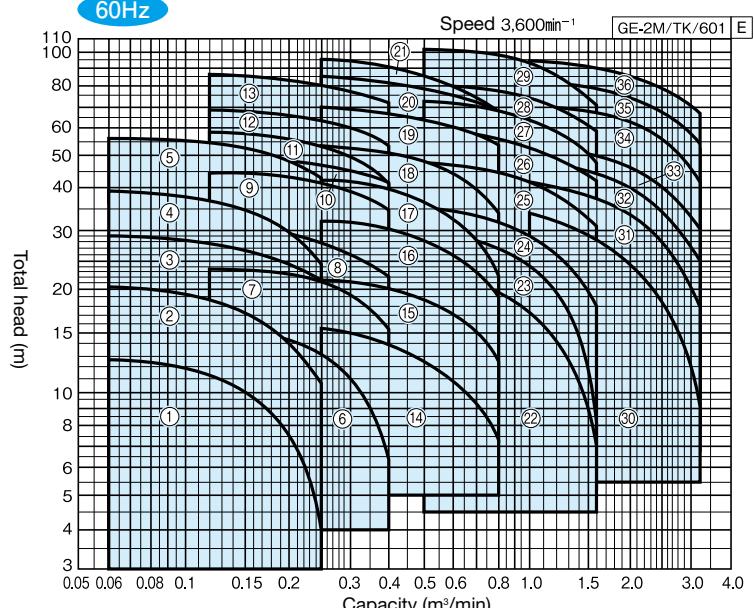

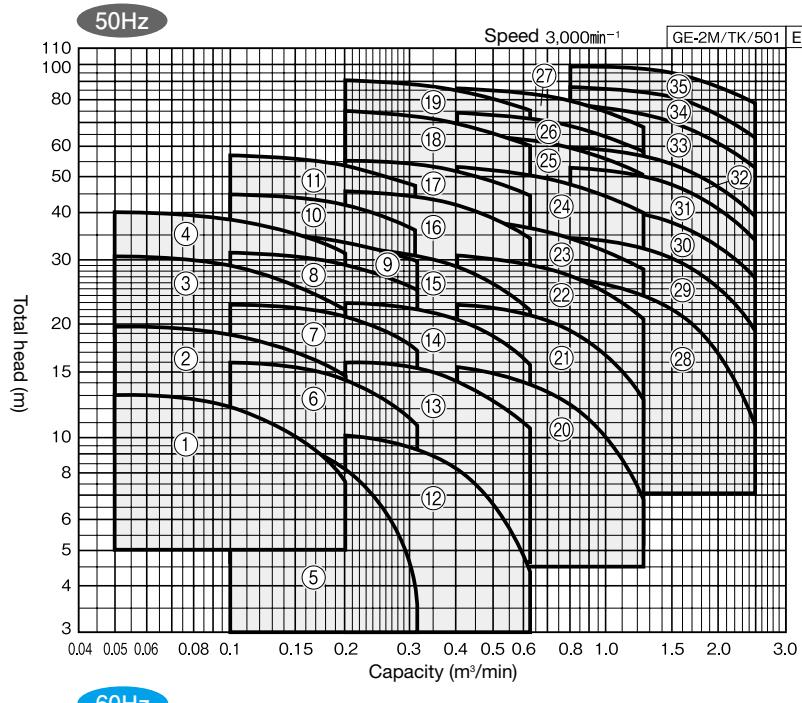

- Compact and light weight
- Easy maintenance and inspection due to back pull out construction
- Long life mechanical seal is adopted for shaft sealing
- Simple end suction top centerline discharge position enable steady installation with high discharge pipe loading
- Wide applications for various usages
- Evaluated item of <Horizontal centrifugal pump> by (C) Public Buildings Association., Ltd. (in Japan)

## Suction total head (20°C)

Suction bore (mm)	50Hz	60Hz
65 or less	-6m (-4.5m : 40 mm 0.4kW, -0.5m : 50 mm 0.4kW -1.2m : 65 mm 0.75kW)	-6m (-1.2m : 0.4kW -4.2m : 65 mm 1.5kW)
80	-6m (-3.5m : 2.2kW)	-5.5m (-4m : 3.7kW)
100	-5m	-3m

## Selection chart

These charts show the performance in case of Kawamoto standard motor.  
Inquire specification sheets and drawings in case of actual work planing.

## Standard specifications

- Liquid Clean water 0~90°C (there should be no freezing)
- Materials Impeller: Cast iron, Bronze or Aluminum bronze  
Shaft : SUS403 (portion contacting liquid)  
Casing : Cast iron
- Shaft sealing Mechanical seal (Ceramic x Carbon)
- Motor TEFC outdoor
- Flange JIS 10K Standard type

Note 1) W is omitted in case W, BW Gland packing types also have same dimensions.

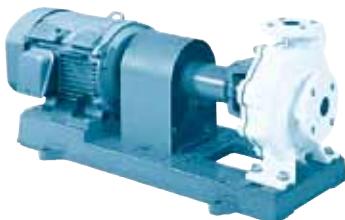

Note 2) If the motor end is within the base, TL ≥ PL+3+ML applies.

Note 3) <-> shows revers direction to the drawing in this table

GE-2M/Hd/600 E

- Standard end suction
- For circulation • Magnet Coupling
- Stainless Self priming type Standard accessory

# GEN-2M Type Centrifugal pump Nylon coating

## Application

(Please inquire in case drinking water application)

## Features

- Compact and light weight
  - Easy maintenance and inspection due to back pull out construction
  - Long life mechanical seal is adopted for shaft sealing
  - Simple end suction top centerline discharge position enable steady installation with high discharge pipe loading
  - Wide applications for various usages
  - Evaluated item of <Horizontal centrifugal pump> by (C) Public Buildings Association., Ltd. (in Japan)

#### ■ Maximum suction total head

Refer to (P.6)

## Standard specifications

- Liquid Clean water 0~40°C (there should be no freezing)
  - Materials Impeller: Bronze  
Shaft : SUS316 (portion contacting liquid)  
Casing : Castiron + Nylon coating
  - Shaft sealing Mechanical seal (SiC x Carbon)
  - Motor TEFC indoor
  - Flange JIS 10K Standard type

## Standard accessories

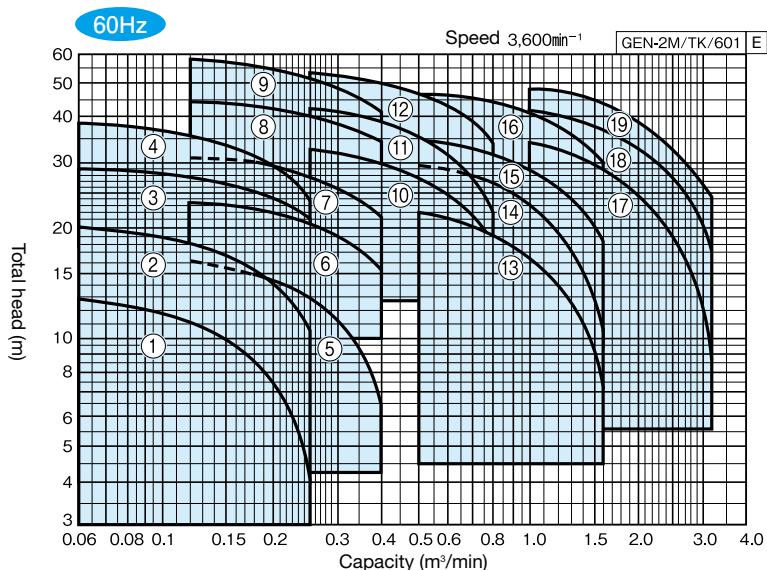

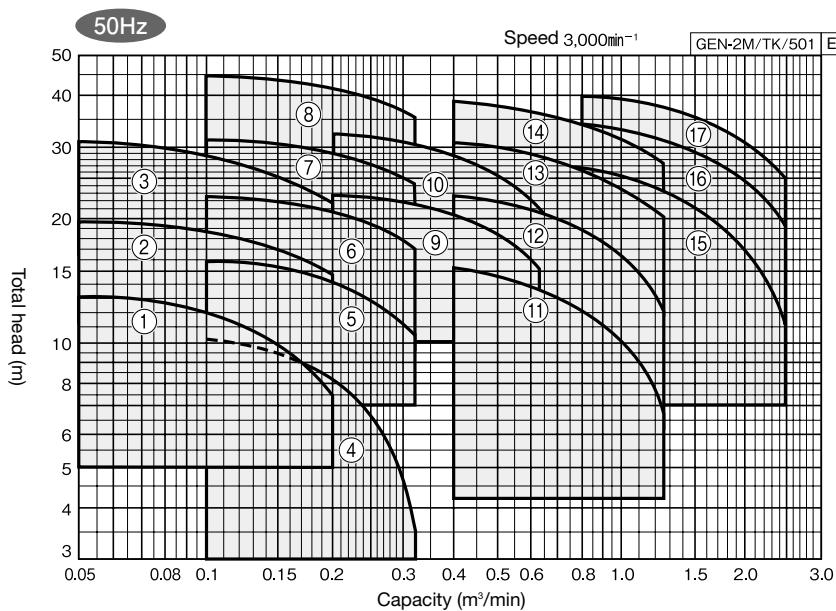

Motor, Base, Coupling, Coupling cover, Priming plug

#### ■ Maximum back pressure

(1-Zero-discharge head of pump) MPa

## Selection chart

These charts show the performance in case of Kawamoto standard motor. Inquire specification sheets and drawings in case of actual work planing.

Standard end suction  
For circulation •  
line pump

Stainless Coupling  
Magnet Coupling

Self priming type  
Standard accessory

# GE-4M Type Centrifugal pump

4 pole

## Application

(Please inquire in case drinking water application)

## Features

- Easy maintenance and inspection due to back pull out construction
- Long life mechanical seal is adopted for shaft sealing
- Simple end suction top centerline discharge position enable steady installation with high discharge pipe loading
- Wide applications for various usages
- Less vibration and quiet operation sound because of 4 pole motor
- Evaluated item of <Horizontal centrifugal pump> by (C) Public Buildings Association., Ltd. (in Japan)

## Suction total head (20°C)

50Hz : -6m	(-4.5m : 50mm 0.4kW)
	(-5.0m : 65mm 0.75kW)
60Hz : -6m	(-5.5m : 150 mm)

## Standard specifications

- |                 |   |
|-----------------|---|
| • Liquid        | Clean water 0~90°C (there should be no freezing)                      |

Note 1) W is omitted in case  $W \leq BW1$ . Gland packing types also have same dimensions.

Note 2) If the motor end is within the base,  $TL \geq PL + J + ML$  applies.

Note 3)  $\leftrightarrow$  shows reverse direction to the drawing in this table

# GEN-4M Type Centrifugal pump Nylon coating

## Application

(Please inquire in case drinking water application)

## Features

- Easy maintenance and inspection due to back pull out construction
- Long life mechanical seal is adopted for shaft sealing
- Simple end suction top centerline discharge position enable steady installation with high discharge pipe loading
- Wide applications for various usages
- Less vibration and quiet operation sound because of 4 pole motor
- Evaluated item of <Horizontal centrifugal pump> by (C) Public Buildings Association., Ltd. (in Japan)

## Suction total head (20°C)

Please refer to P.13

## Standard specifications

- Liquid Clean water 0~40°C (there should be no freezing)
- Materials Impeller: Cast iron or Bronze  
Shaft : SUS316 (portion contacting liquid)  
Casing : Cast iron + Nylon coating
- Shaft sealing Mechanical seal (SiC x Carbon)
- Motor TEFC indoor
- Flange JIS 10K Standard type

## Standard accessories

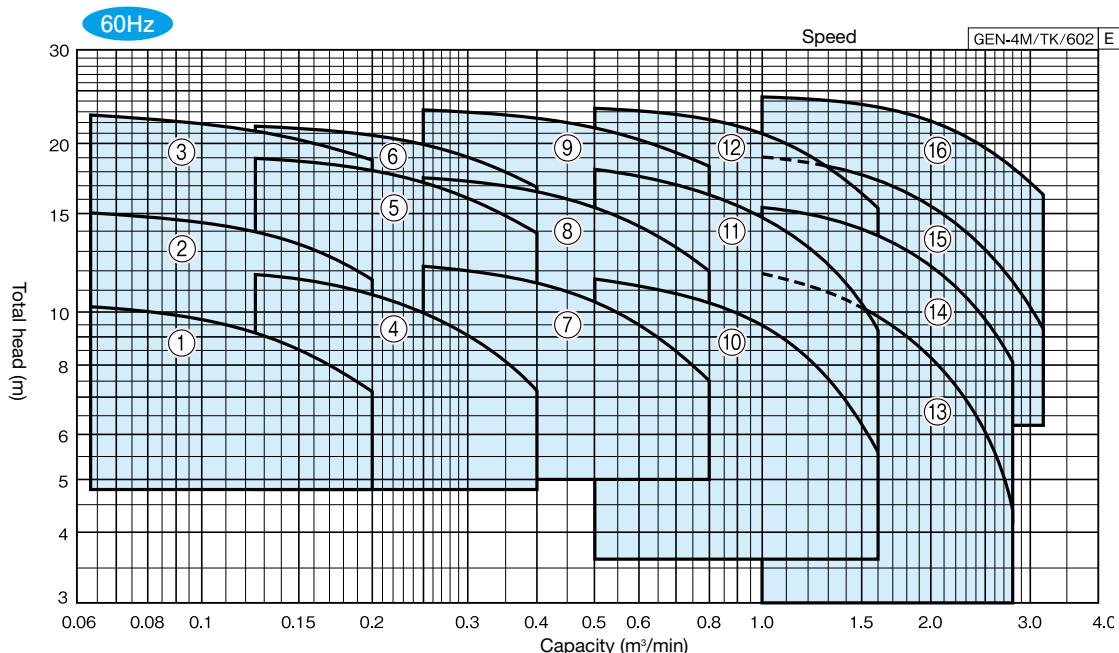

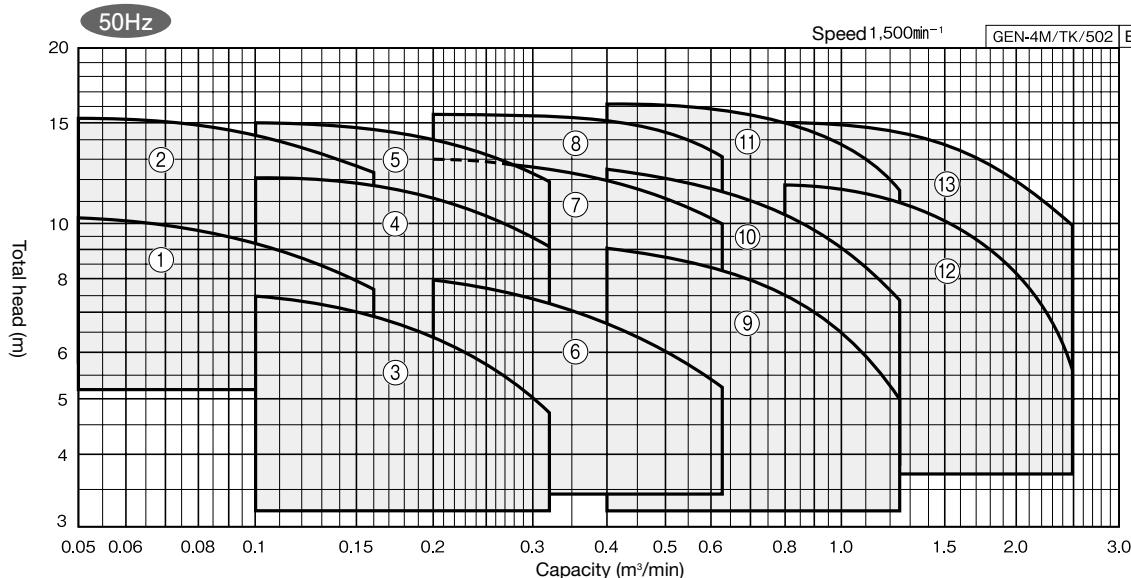

Motor, Base, Coupling, Coupling cover

## Maximum back pressure

(1-Zero-discharge head of pump) MPa

## Selection chart

These charts show the performance in case of Kawamoto standard motor.  
Inquire specification sheets and drawings in case of actual work planing.

# GF-4M Type Centrifugal pump

4 pole

## Application

(Please inquire in case drinking water application)

## Features

- Easy maintenance and inspection due to back pull out construction
- Simple end suction top centerline discharge position enable steady installation with high discharge pipe loading
- Wide applications for various usages
- Less vibration and quiet operation sound because of 4 pole motor
- Evaluated item of <Horizontal centrifugal pump> by (C) Public Buildings Association., Ltd. (in Japan)
- \* Models with a suction bore of 200 mm or less.  
Please inquire in cases the bore size is 250 mm or more.

## Maximum suction total head

Standard model: positive suction application only (more than 0.098 MPa)  
Negative suction and high back pressure application: Order made

## Standard specifications

- Liquid Clean water 0~90°C (there should be no freezing), 0~60°C (bore size 250mm or more)
- Materials Impeller: Aluminum bronze or Bronze  
Shaft : SUS420J2 or SUS403  
(portion contacting liquid)  
Casing : Castiron or Ductile cast iron
- Shaft sealing Gland packing
- Motor TEFC indoor
- Flange JIS 10K Standard type (Suction and Discharge)  
JIS 20K (Discharge) (Bore size 250mm GFQ)

## Standard accessories

Motor, Base, Coupling, Coupling cover

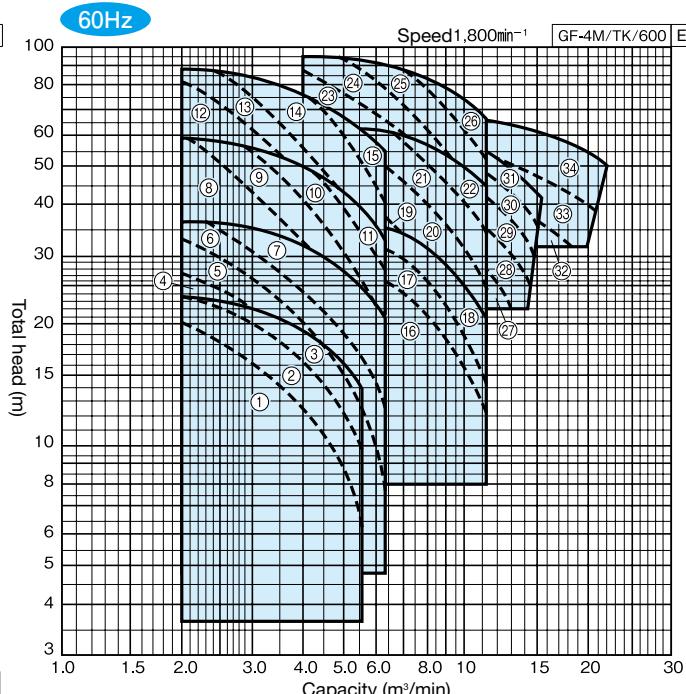

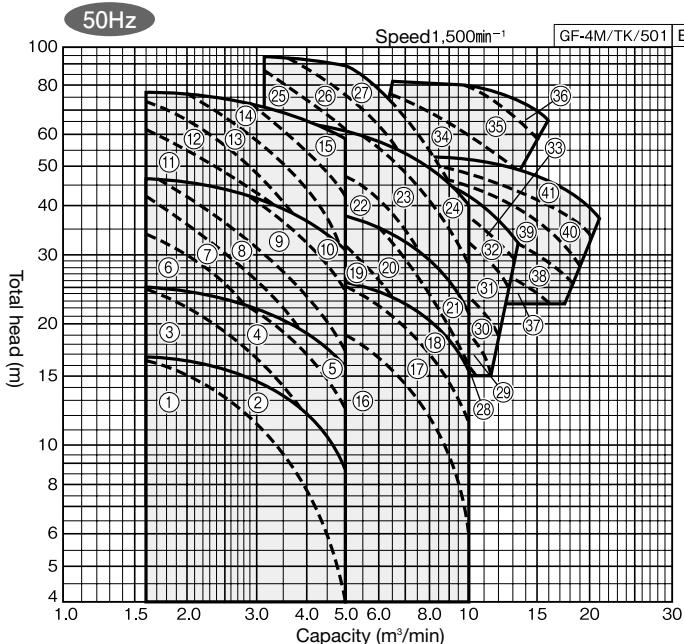

## Maximum back pressure

(Please inquire in case bore size is 250mm or more)

(1.4-Zero-discharge head of pump) MPa or 0.7MPa either lower pressure

## Selection chart

These charts show the performance in case of Kawamoto standard motor.  
Inquire specification sheets and drawings in case of actual work planning.

Standard end suction

For circulation line pump

Magnet Coupling

Self priming type

Standard accessory

**GD·GDF Type****High back pressure  
Centrifugal pump****2 pole  
4 pole**

Exclusive for positive suction application

**Application**

(Please inquire in case drinking water application)

**Features**

- High back pressure series adopting balance type mechanical seal for shaft sealing and Ductile cast iron material for casing.
- Simple end suction top centerline discharge position enable steady installation with high discharge pipe loading
- High efficiency and wide applications for various usages
- Less vibration and quiet operation sound
- Easy maintenance and inspection due to back pull out construction
- Evaluated item of <Horizontal centrifugal pump> by (C) Public Buildings Association., Ltd. (in Japan)

**Maximum suction total head**

Exclusive for positive suction application

**Maximum back pressure**

(Please inquire in case bore size is 250mm or more)

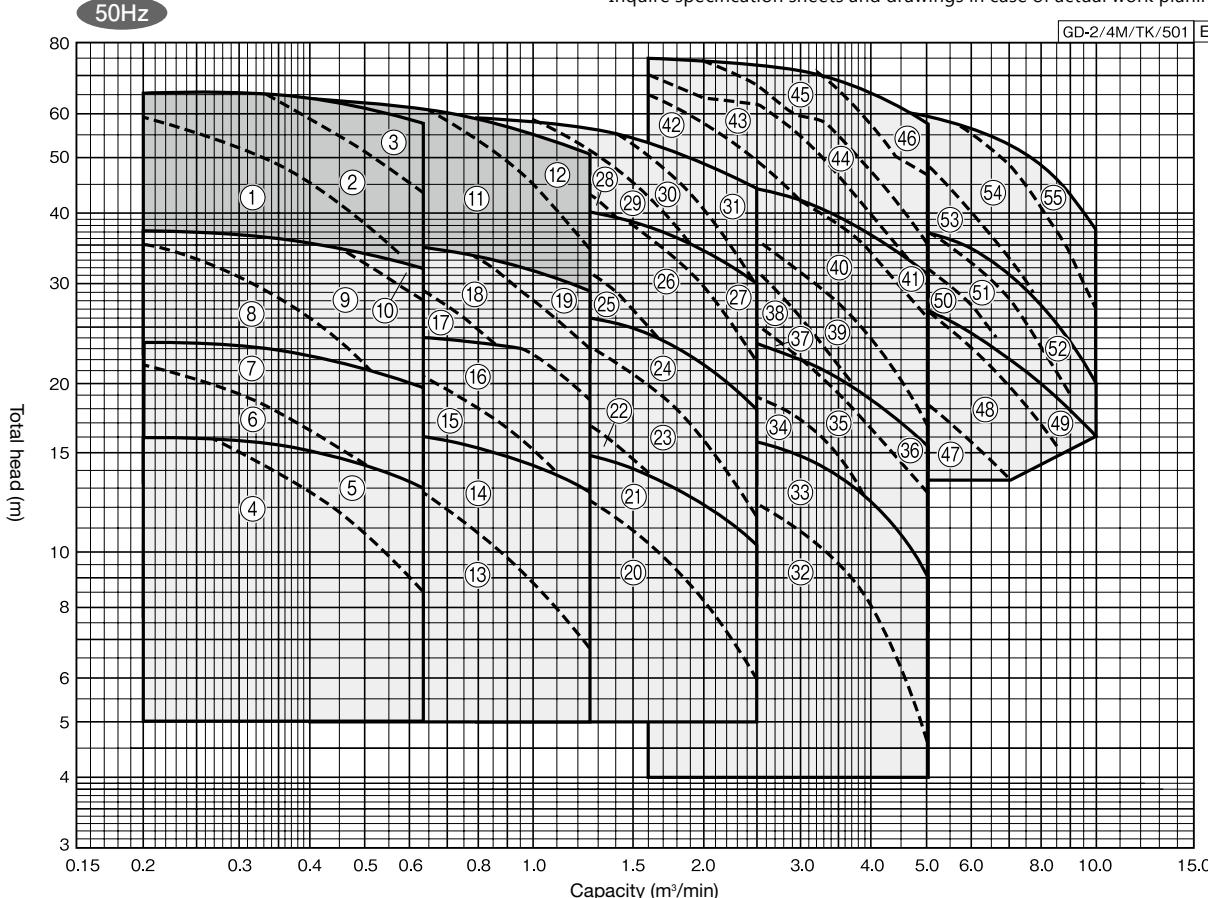

GD type	(1.4-Zero-discharge head of pump) MPa
GDF type	More than 0.5 MPa below 2.0 MPa (More than 0.5 MPa below 1.6 MPa bore size 200 mm models) Maximum pumping pressure 2.5MPa

**Standard specifications**

- Liquid
  - GD type : Clean water 0~80°C (there should be no freezing)
  - GDF type: Clean water 0~80°C (there should be no freezing) 0~60°C (bore size 250mm or more)
- Materials
  - Impeller : Bronze or Aluminum bronze
  - Shaft : GD type : SUS420J2Q or GDF type: SUS420J2Q or SUS403 (portion contacting liquid)
  - Casing : Ductile cast iron
- Shaft sealing Balance type mechanical seal (SiC x Carbon)
- Motor TEFC indoor
- Flange
  - GD type : JIS 10K Standard type (Suction and Discharge)
  - GDF type: JIS 10K Standard type (Suction side of bore size 250mm or more models) JIS 16K (Discharge side of bore size 200mm or more models)
  - JIS 20K (Suction and Discharge)

**Standard accessories**

Motor, Base, Coupling, Coupling cover

**Selection chart GD type (Please inquire about GDF type)**These charts show the performance in case of Kawamoto standard motor.  
Inquire specification sheets and drawings in case of actual work planing.

F/Hd/600 E

Standard end suction

For circulation •  
Magnet CouplingSelf priming type  
Standard accessory

# GN2-C Type Compact centrifugal pump Nylon coating 2 pole

## Application

## Features

- Unique rust proof treatment (PAT. pending)
- Easy maintenance and inspection due to back pull out construction
- Smaller installation space and not necessary of centering because of close coupled type pump

## Suction total head (20°C)

-6 m

## Maximum back pressure

(0.7–Zero-discharge head of pump) MPa

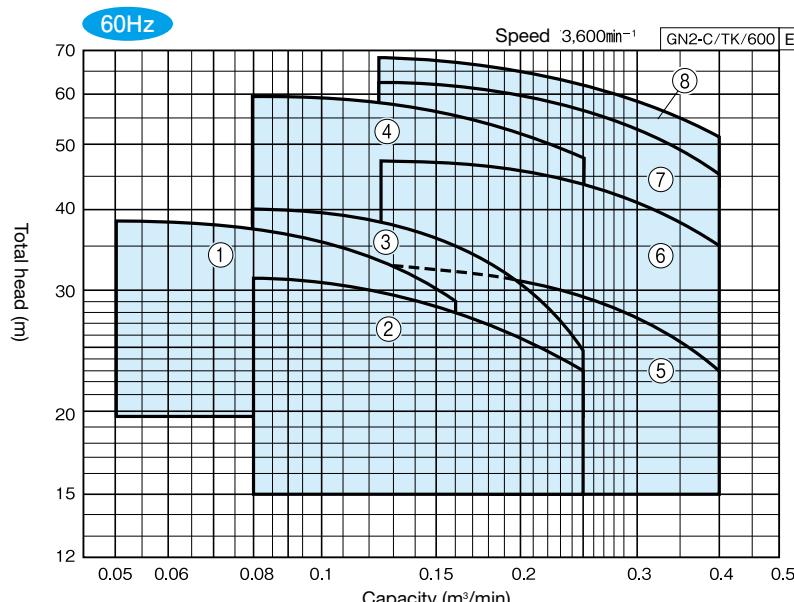

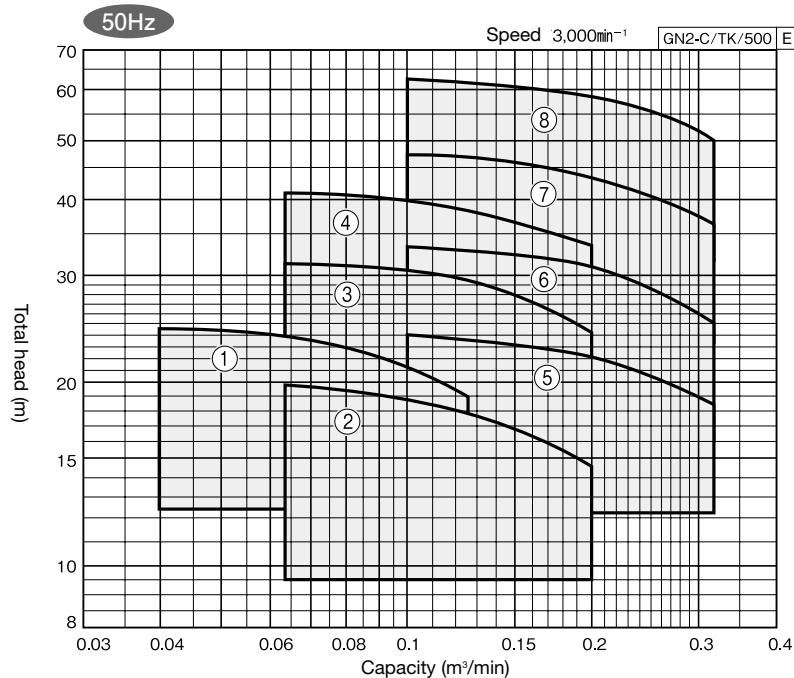

## Standard specifications

- Liquid Clean water 0~40°C  
(there should be no freezing)
- Materials Impeller: Bronze  
Shaft : SUS304  
(portion contacting liquid)  
Casing : Cast iron + Nylon coating
- Shaft sealing Mechanical seal  
(Ceramic x Carbon)
- Motor TEFC outdoor
- Flange JIS 10K Thin type

## Standard accessories

Motor, Base

## Selection chart

# PSS(2) Type Stainless steel in line pump

Petit Line below 0.4 kW  
Stainless Steel P Line over 0.75kW  
2 pole

## Application

## Features

- Precision cast stainless material protect the pump from rust and thus maintenance is easy
- Long life and strong against leakage due to adoption of high quality mechanical seal which can stand antifreeze
- Strong against deterioration of bearing and insulation due to TEFC motor

## Suction total head (20°C)

Bore	Maximum suction total head
20~65mm	-6m
80mm	50Hz: -5.5m 60Hz: -3m

Note) If the value obtained by subtracting 3 m from the total head is less than the value above, the value obtained by subtracting 3 m from the total head will be the maximum suction total head.

## Standard specifications

- Liquid Clean water 0~90°C (there should be no freezing) Maximum 100°C (Please inquire)
- Materials Impeller: SCS13  
Shaft : SUS304  
Casing : SCS13
- Shaft sealing Mechanical seal (SiC x Carbon)
- Motor TEFC outdoor
- Flange Special flange

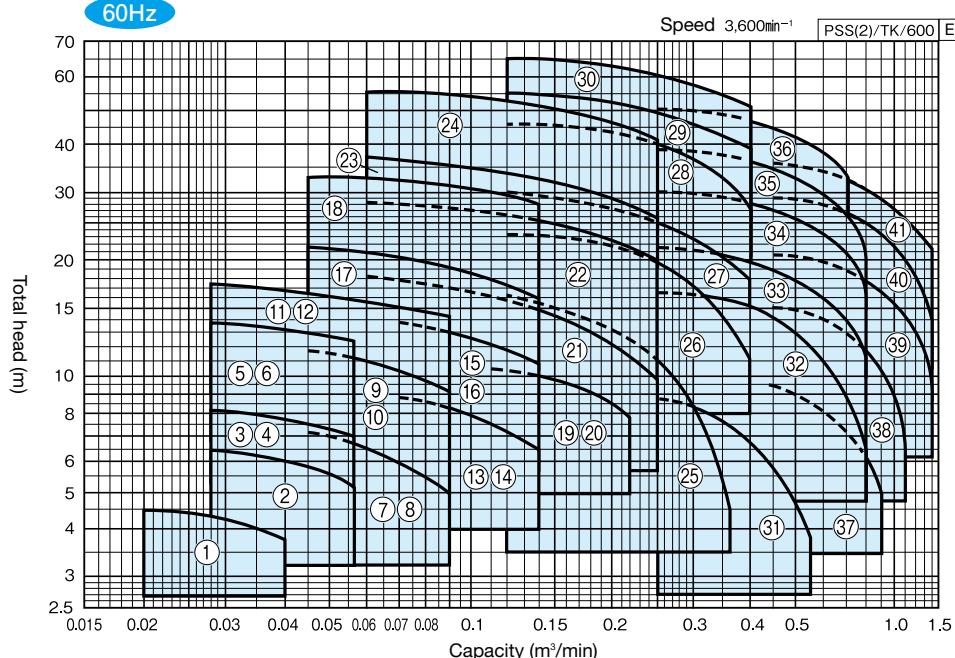

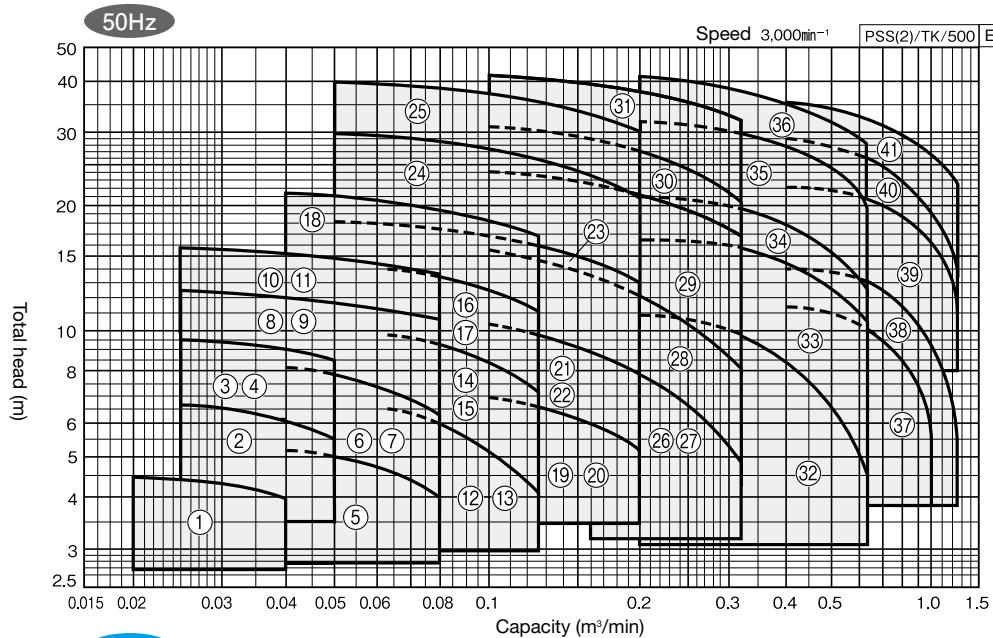

## Standard accessories

Companion flanges

## Maximum back pressure

0.15kW or less	Single phase 0.2MPa
	Three phase (0.5 – Zero-discharge head of pump) MPa
0.25kW ~ 0.4kW	(0.7 – Zero-discharge head of pump) MPa
0.75kW or more	(1 – Zero-discharge head of pump) MPa

PSS(2)/d/620 E

## = For circulation

# PE (2) Type P in Line pump

2 pole

### Application

(Please inquire in case drinking water application)

### Features

- Strong against deterioration of bearing and insulation due to TEFC motor
- Long life and strong against leakage due to adoption of high quality mechanical seal which can stand antifreeze
- Less rust and easy maintenance

### Suction total head (20°C)

Bore 20mm ~ 65mm	-6m
Bore 80mm	50Hz: -5.5m 60Hz: -3m

Note) If the value obtained by subtracting 3 m from the total head is less than the value above, the value obtained by subtracting 3 m from the total head will be the maximum suction total head.

### Standard specifications

- Liquid Clean water 0~90°C (however there should be no freezing)  
(Maximum 100°C Please inquire)
- Materials Impeller: SCS13  
Shaft : SUS304 (portion contacting liquid)  
Casing : Cast iron
- Shaft sealing Mechanical seal (SiC x Carbon)
- Motor TEFC outdoor
- Flange Special flange (bore size 25mm or less model)  
JIS 10K thin type (bore size 32mm or more model)

### Standard accessories

Companion flanges

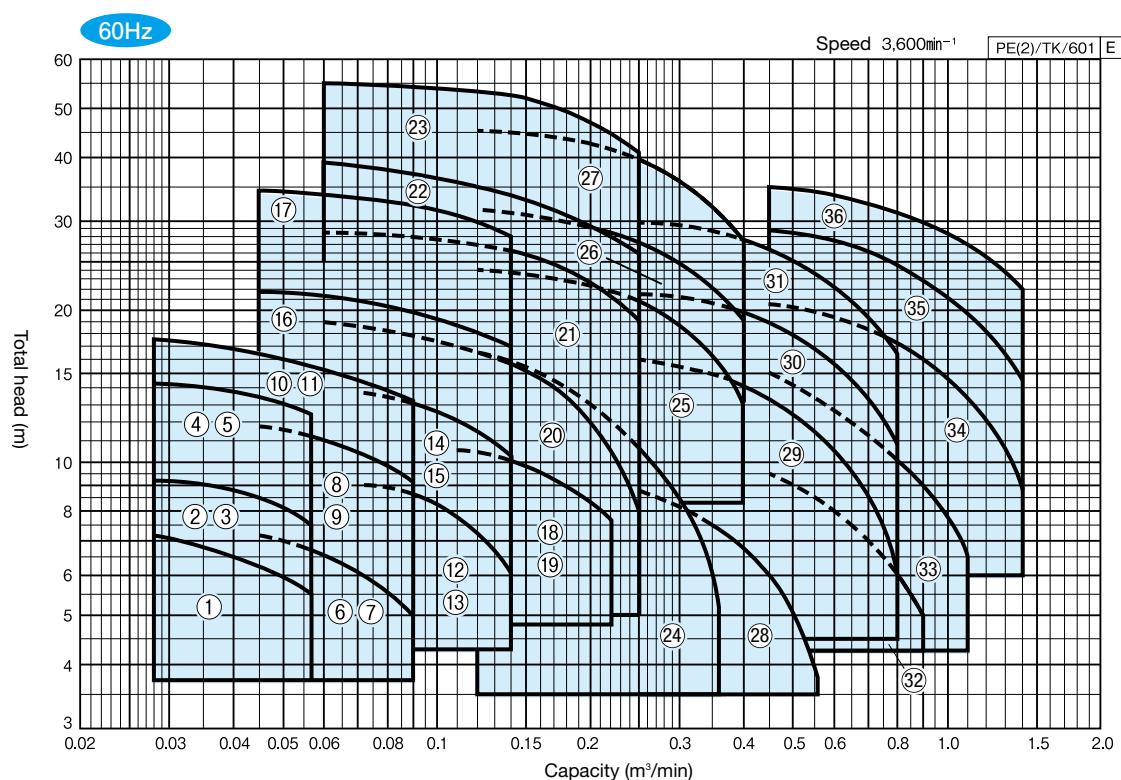

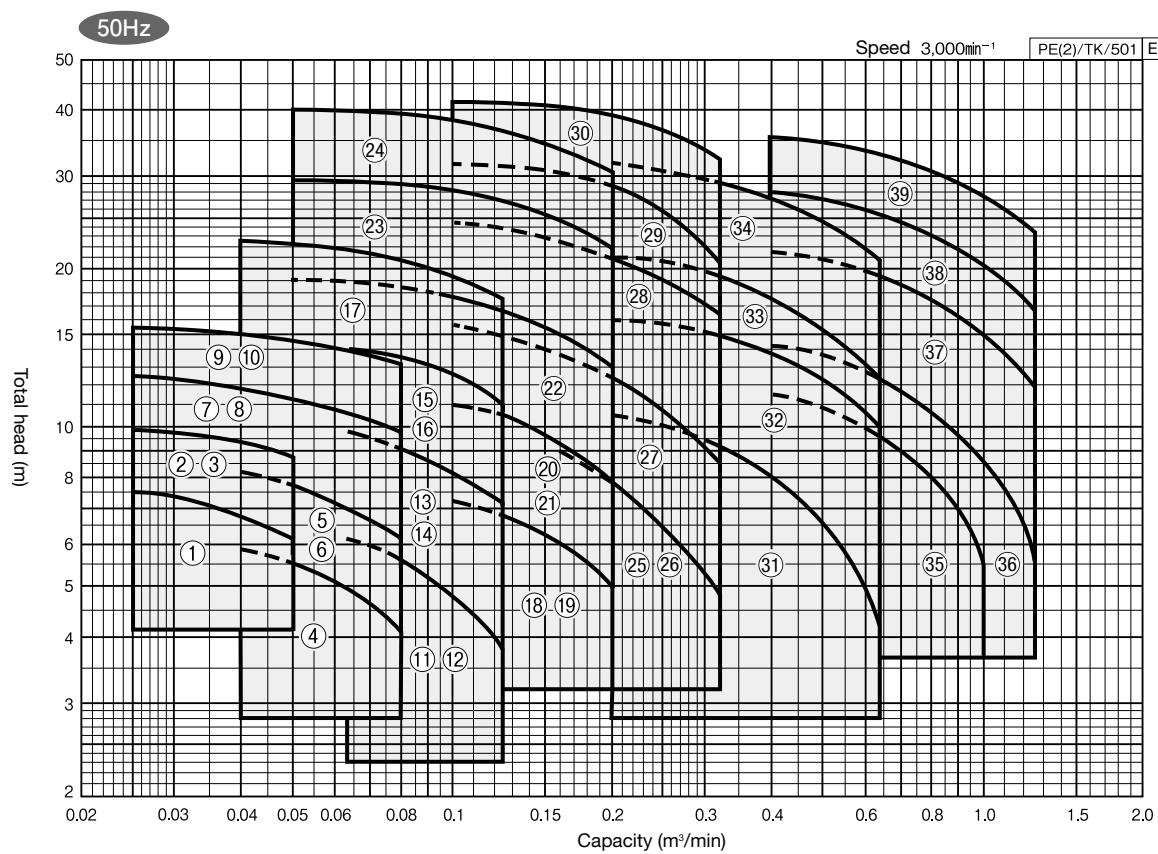

### Maximum back pressure

0.15kW or less	Single phase 0.2MPa
	Three phase (0.5 – Zero-discharge head of pump) MPa
0.25kW or more	(0.7 – Zero-discharge head of pump) MPa

# PE (2) Type

## Selection chart

These charts show the performance in case of Kawamoto standard motor.

Standard end suction  
For circulation ·  
line pump

Magnet Coupling  
Stainless  
Self priming type

Standard accessory

# GRM Type Magnet Coupling Pump

2 pole

## Application

## Features

- Sealless construction of magnet coupling
- Excellent corrosion resistance and long life
- Easy maintenance and inspection due to back pull out construction

## Standard specifications

- Liquid Please inquire to us or our distributors about liquid available to be handled (liquid quality, liquid temperature and etc) by each application
- Materials Impeller, Casing, Cover : SCS14  
Shaft : SUS316  
Submersed bearing, Sleeve: SiC
- Construction Pump + Motor  
Magnet coupling sealless construction
- Installation Indoor
- Motor TEFC indoor
- Flange JIS 10K Standard type

## Standard accessories

Motor, Base

## Maximum back pressure

(1-Zero-discharge head of pump) MPa

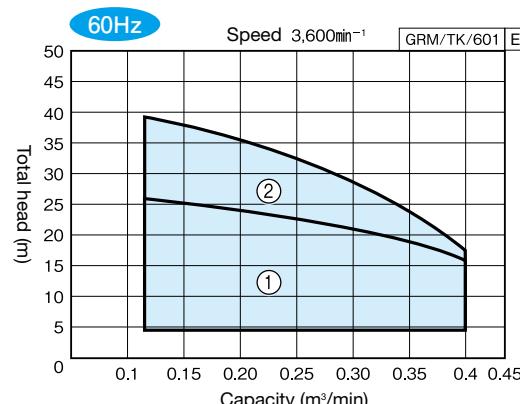

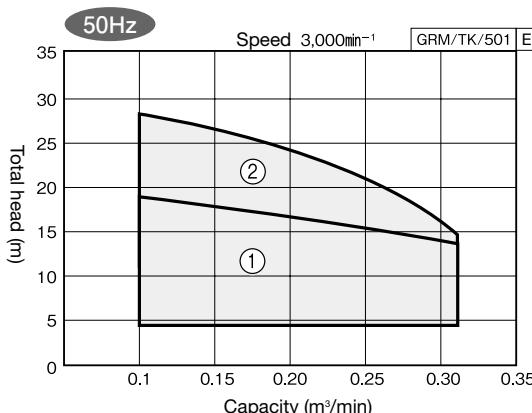

## Suction total head (20°C)

-6 m

# GES-C Type Stainless steel compact centrifugal pump 2 pole

## Application

## Standard specifications

- Liquid Clean water 0~90°C (there should be no freezing)
- Materials Impeller: SCS14  
Shaft : SUS304  
Casing : SCS13
- Shaft sealing Mechanical seal (Ceramic x Carbon)
- Motor TEFC outdoor
- Flange JIS 10K Standard type

## Features

- Compact, light weight and less installation space
- Easy maintenance and inspection due to back pull out construction
- High efficiency, excellent pump performance, high back pressure and excellent suction performance.
- Maintenance is easy because long life mechanical seal is adopted for shaft sealing and compact mono block construction.
- Evaluated item of <Horizontal centrifugal pump> by (C) Public Buildings Association., Ltd.

## Maximum suction total head (20°C)

-6 m

2 pole stainless steel centrifugal pump

2 pole stainless steel self-priming centrifugal pump

Standard end suction

For circulation •

Magnet Coupling

Self priming type

Standard accessory

# GES-2M Type Stainless centrifugal pump 2 pole

- Inquire sea water and other special liquid applications

## Application

## Features

- Sanitary and clean due to stainless material are used for portion contacting liquid
- Maintenance is easy because long life mechanical seal is standardly adopted for shaft seal with few water leakages
- Easy maintenance and inspection due to back pull out construction
- Long life and strong against dust and humidity because TEFC outdoor motor is standardly adopted
- High efficiency and high total head pump design by using precision cast stainless steel material

## Maximum suction total head (20°C)

-6 m

## Standard specifications

- Liquid Clean water 0~90°C (there should be no freezing)
- Materials Impeller: SCS14  
Shaft :SUS316  
Casing :SCS13
- Construction Impeller Closed type  
Shaft sealing Mechanical seal (SiC x Carbon)
- Bearing Closed ball bearing
- Motor TEFC indoor
- Flange JIS 10K Standard type

## Standard accessories

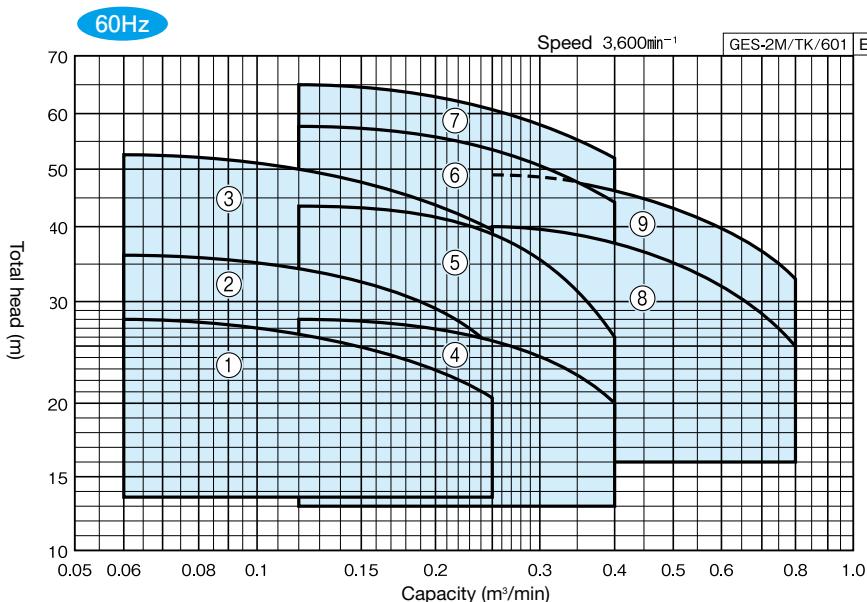

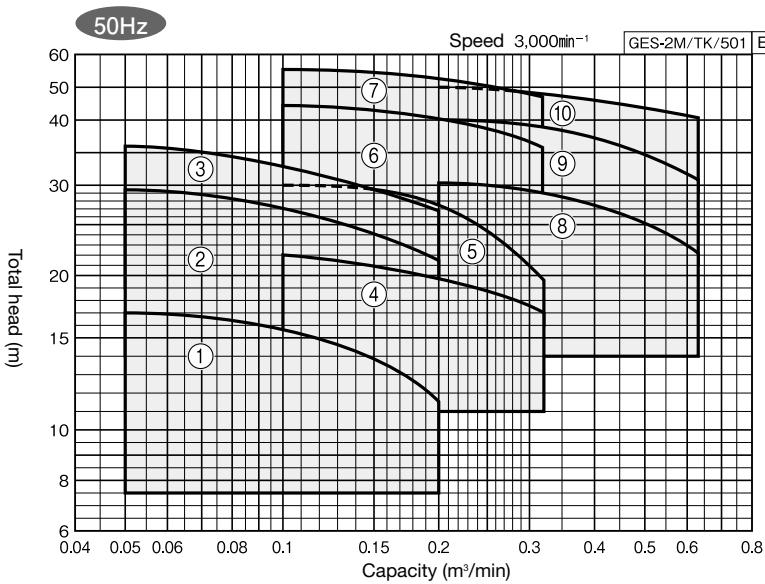

Motor, Base, Coupling, Coupling cover

## Maximum back pressure

(1-Zero-discharge head of pump) MPa

## Selection chart

These charts show the performance in case of Kawamoto standard motor.

Magnet Coupling

Self priming type  
Standard accessory

# GES-4M Type Stainless centrifugal pump 4 pole

- Inquire sea water and other special liquid applications
- Inquire anti-freezer application

## Application

## Features

- Sanitary and clean due to stainless material are used for portion contacting liquid
- Maintenance is easy because long life mechanical seal is standardly adopted for shaft seal with few water leakages
- Easy maintenance and inspection due to back pull out construction
- Long life and strong against dust and humidity because TEFC indoor is standardly adopted
- High efficiency and high total head pump design by using precision cast stainless steel material
- Evaluated item of <Horizontal centrifugal pump> by (C) Public Buildings Association., Ltd.

## Standard specifications

- |                 |   |
|-----------------|---|
| • Liquid        | Clean water 0~90°C (there should be no freezing)  |
| • Materials     | Impeller: SCS14<br>Shaft :SUS316<br>Casing :SCS13 |
| • Shaft sealing | Mechanical seal (SiC x Carbon)                    |
| • Motor         | TEFC indoor                                       |
| • Flange        | JIS 10K Standard type                             |

## Standard accessories

Motor, Base, Coupling, Coupling cover

## Maximum back pressure

(1-Zero-discharge head of pump) MPa

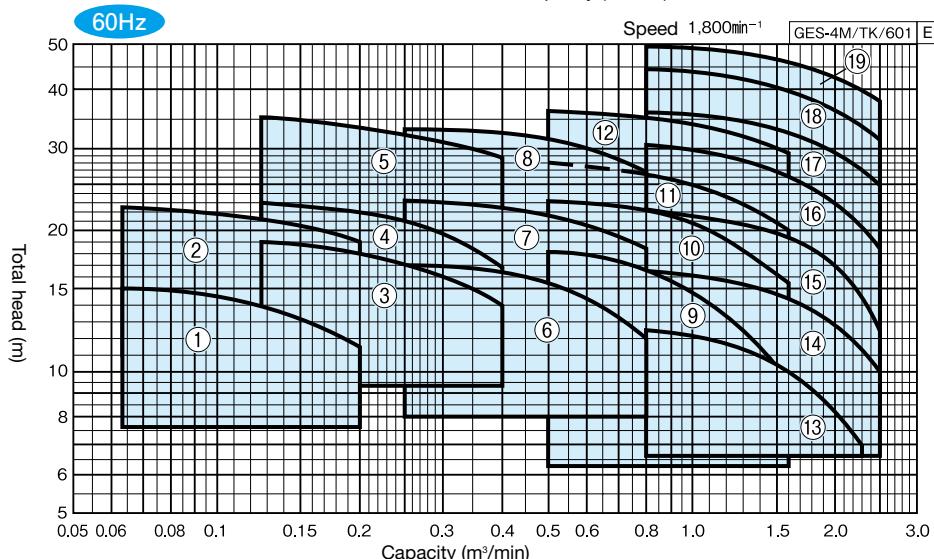

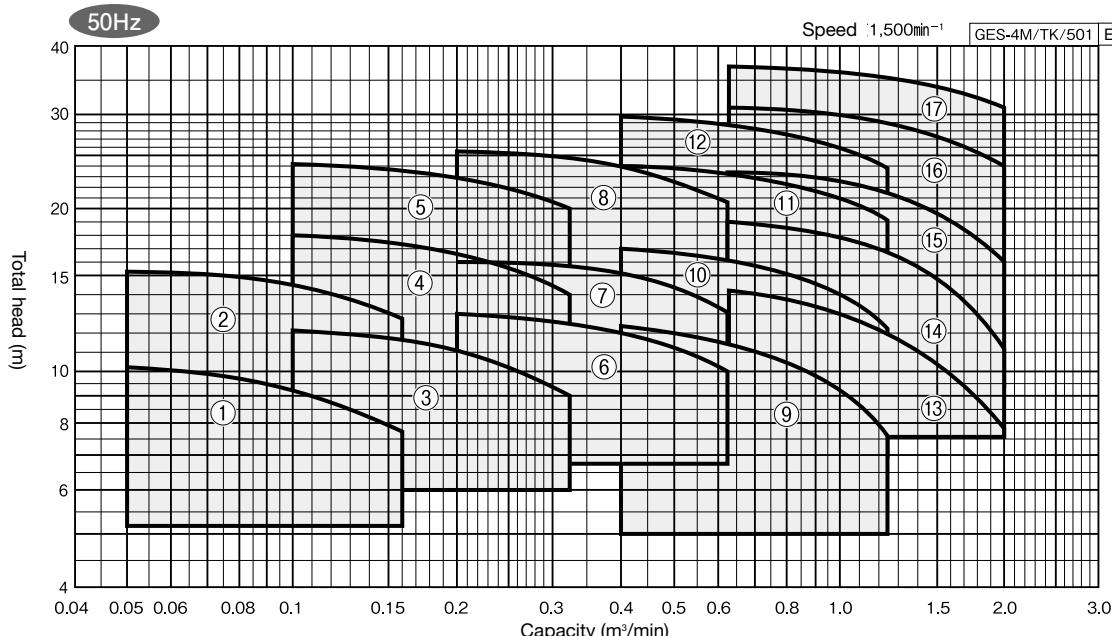

## Maximum suction total head (20°C)

-6 m

Note 1) If the value obtained by subtracting 3 m from the total head is less than the value above, the value obtained by subtracting 3 m from the total head will be the maximum suction total head.

## Selection chart

These charts show the performance in case of Kawamoto standard motor.

GES-4M/Hd/600 E

# FS (4) Type Self-priming centrifugal pump Selsuper 4 pole

V belt pulley models  
are also available

## Application

(Please inquire in case drinking water application)

## Features

- Self-priming pump construction does not require foot valve and makes priming works easier
- High efficiency and high suction performance
- Easy maintenance and inspection due to back pull out construction
- Sealed ball bearings required no oiling

## Standard accessories

Motor, Base, Coupling, Coupling cover,  
Strainer, Companion flanges

## Standard specifications

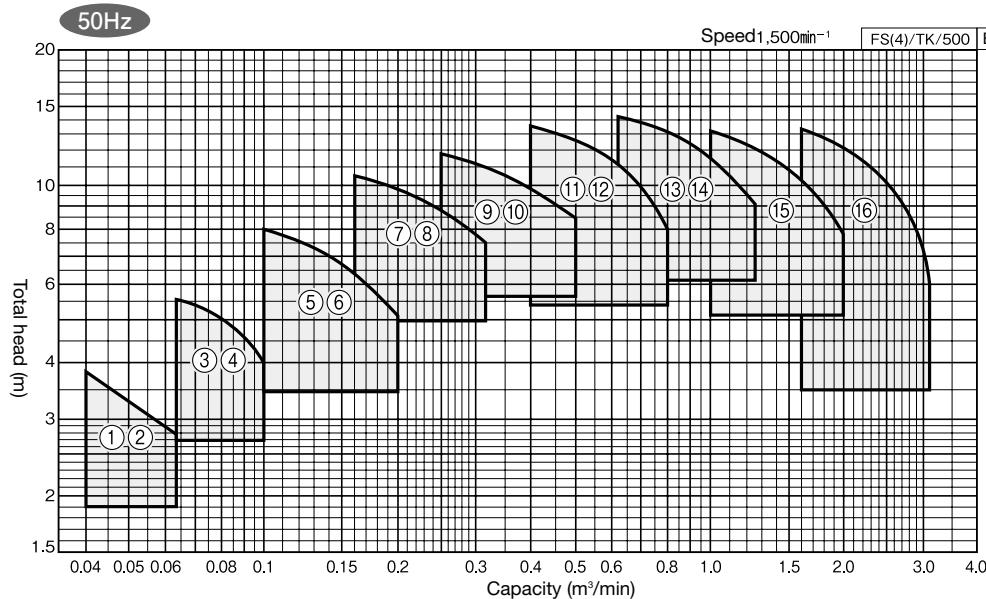

- |                 |   |
|-----------------|---|
| • Liquid        | Clean water 0~40°C (there should be no freezing)  |
| • Materials     | Impeller: Cast iron<br>Shaft : SUS403 or SUS403 (portion contacting liquid)<br>Casing : Cast iron |
| • Shaft sealing | Gland packing, Mechanical seal  |
| • Motor         | TEFC outdoor, ODP (Single phase 0.2, 0.4 kW)  |

## Suction total head (20°C)

Suction bore (mm)	50Hz	60Hz
25	-3m	-3m
32	-3.5m	-5m
40~65	-5.5m	
80~150	-6m	

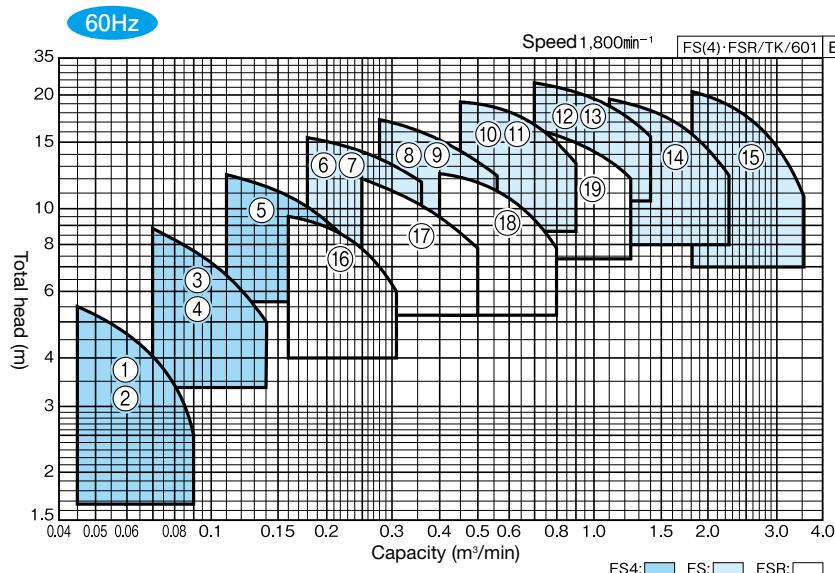

## Selection chart

These charts show the performance in case of Kawamoto standard motor.  
Inquire specification sheets and drawings in case of actual work planing.

Bore	Ref	Model	Motor
mm			kW

# GSO<sub>3</sub><sup>2</sup>-C Type Self-priming centrifugal pump 2 pole

Photo show GSO-50-C model

## Suction total head (20°C)

Output (kW)	Suction total head
0.4	-8.5m (Maximum -9m)
0.75, 1.5	-8m (Maximum -9m, Bore size 50mm model : Maximum -8.4m)

Note) Discharge performance may drop when pump operate under negative suction at maximum suction total head.

## Application

(Please inquire in case drinking water application)

## Features

- Superior suction performance (max -9m is available PAT. pending)
- Strong and durable construction against sand by adopting special kind mechanical seal
- Excellent performance make it possible to pump up much water even from draw down well
- Back pull out construction
- Semi open impeller enable stuck free pumping works
- Long life and strong against dust and humidity because TEFC motor is standardly adopted

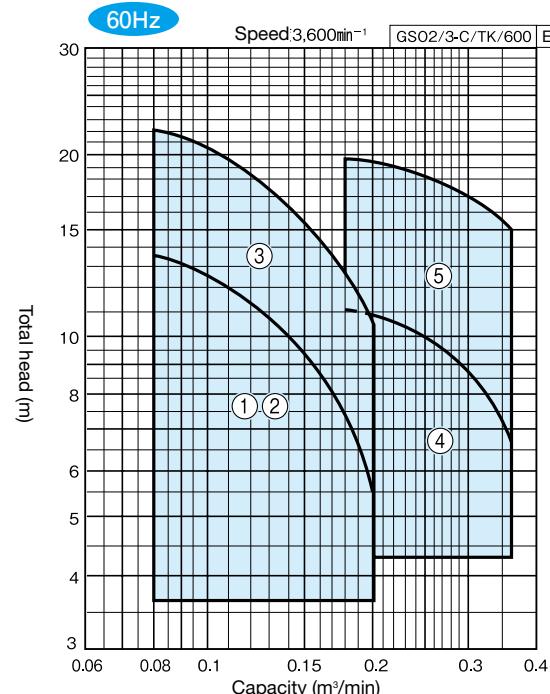

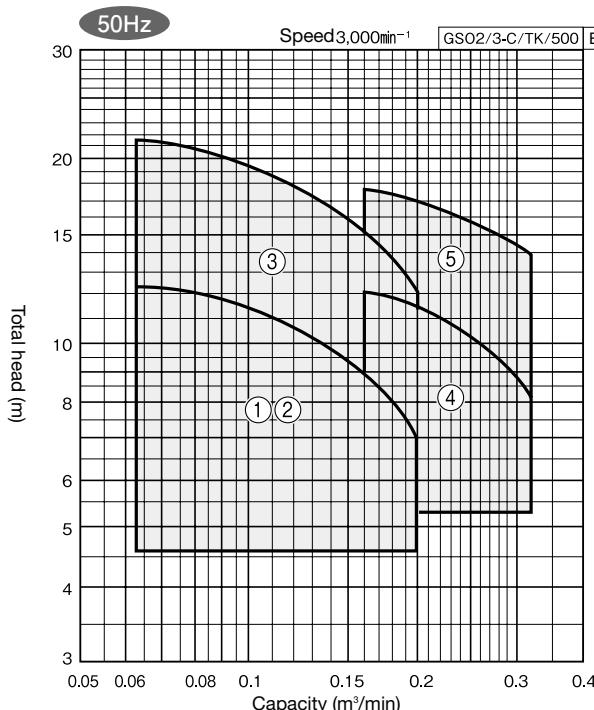

## Standard specifications

- Liquid Clean water 0~40°C (there should be no freezing)
- Materials Impeller: Bronze or SCS13  
Bore size 50mm model:  
Resin (Impeller hub: Bronze)  
Shaft : SUS304  
(portion contacting liquid)  
Casing : Cast iron
- Shaft sealing Mechanical seal (SiC x Carbon)
- Motor TEFC outdoor

## Standard accessories

Base, Companion flanges, Motor protection switch, Power cable, (Single phase models only)

## Selection chart

	5	GSO2-506CE1.5	1.5

= Standard accessory (Foundation bolt set, pressure gauge, compound gauge, reducer are also available Inquire) =

## Sluice valve/Check valve

### Sluice valve (Inner screw type)

- Valve set including sluice valve, check valve, packing, bolts, nuts, and attaching adapters is also available

Bore: 40~200mm  
Nylon coating model  
Bore 40~150mm is also available

### Swing check valve (with by pass)

Bore: 40~200mm

### Shockless valve (impact relief check valve)

- Less friction loss protect pump and piping from water hammer

Nylon coating model is also available

## Foot valve/Suction unit

### VF-VF2 foot valve with lever

(With 3m stainless steel wire)  
● VF2: Rust free resin material

VF2  
32~80mm

VF  
40~80mm

### Stainless steel foot valve

- Using SCS13 for main parts, hard and long life

VFST (2)  
40~100mm

VFF: Flange type  
100~250mm is also available

### Suction unit

- Useful for maintenance and inspection of foot valve and suction pipe
- Lever of foot valve is easy able to move from the ground
- Foot valve and suction pipe is able to lift up from the ground (not necessary to enter in the water tank)

Bore: 40~250mm  
SSF-S: Stainless steel type is also available

## Vibration isolator

### Application

- Prevent pump from vibration and resonance

### Features

- Various types of vibration proof beds are available, enabling you to select one to meet your needs in view of the surrounding environment.
- Installation is easy because not necessary particular foundation and installation work at the site
- Can treat working load after pump operation, management for maintenance and control can be saved

QRE                    PX

## Vibration proof joint · Pipe silencer

### Vibration proof joint (rubber ball type)

Bore: 25~200mm

- Can not be used for hot water supply and water circulation for pool water

### Pipe silencer

Bore: 32~200mm

- Absorb pressure pulse and vibration from pump
- Can directly connect with pump same as vibration proof joint
- Nylon coating flange type for preventing red discolorment water is also available
- Can be used at both suction and discharge side
- Can not be used for hot water supply and water circulation for pool water

## Heater for pump

### Application

- Prevent pump from broken by freezing

### Features

- Accurate working by adopting special thermostat
- Be able to check heater wire is cut together with working of control panel

### Heater of pump (with 3m code)

Thermostat is included as standard for Heater

### Heater control panel (indoor installation)

Combination use with Heater (Thermostat built in)

Model	Rated capacity (W)	Rated voltage (V)	Display	Alarm terminal
ECH3-0.4T	50~440	AC200	Power source, Power on, Wire cut	No voltage
ECH4-0.4		AC100/200	—	—

Standard end suction  
For circulation •  
Magnet Coupling

Stainless  
Self priming type

Standard accessory

## Important Safty Precautions

Always read this manual thoroughly and fully comprehend the contents before starting use.

- Matters falling under the following may not be covered by the warranty: uses which go beyond the specified scope of application, failure to comply with precautions, improper repairs and alterations, matters arising from natural disasters, matters arising from the installation environment (power source, foreign objects, sand etc.), non-compliance with laws and regulations or standards pertaining thereto, persons who suffer accidental or intentional damage or injury, replacement of consumable parts, defects due to resale, etc.
- Close attention is needed when rusting and corrosion/elution of metals are not permissible owing to the application or liquid. Take into account both the pump and the rest of the equipment when considering and selecting.
- Apply repair coating at an institute which supports your operating environment. Depending on the operating environment, rust may form on screw parts, processed parts with anti-rust coating, anti-rust coated parts etc. due to high humidity, condensation, getting wet etc., which may lead to unexpected damage.
- Close attention is needed in the case of circulation uses where rusting and corrosion/elution of metals are not permissible. Take into account both the pump and the rest of the equipment when considering and selecting. Unexpected damage may arise from condensation of circulating water.
- Select a product which is appropriate for your application. Inappropriate use of products may cause accidents.
- Always use this pump within the specified product specifications. Failure to do so could result in electric shock, fire, water leakage, etc.
- When using this pump for living things (fishery, fish tank, aquarium, etc.) or important equipment, always prepare a spare unit. If the pump fails, an oxygen deficiency or degradation of water quality, etc., could occur and affect the creature's life.
- If used to transport food-related items, give due consideration to the materials used. Contamination by foreign objects may occur.
- Avoid using this product with living things that are susceptible to copper alloys. The life of the creature could be affected.
- Do not connect the pump directly to water main pipes. Depending on the country It may be prohibited under the Water Supply Act. Also, water backflow may contaminate tap water.
- Carry out installation in accordance with applicable legal requirements (electrical equipment guideline, interior wiring regulations, building codes, etc.) Failure to observe this may not only violate legal requirements, but could also result in fire or electric shock, or injury caused by falls or topples.
- Observe the service life of the pump, install it in a well ventilated place free from corrosive or explosive gases, salt, moisture, water vapor, condensation etc., and avoid exposing it to wind, rain and direct sunlight. In a harsh environment, electric leakage, electric shock or fire may result from deterioration of insulation in the motor or control panel, etc.
- Do not install in places with no drainage or places which have not been waterproofed. Water leaks may cause serious damage. \* We bear no responsibility for any damage arising from lack of drainage or waterproofing.
- Depending on the equipment, attach a filter etc. appropriate for your application on the discharge side before use, perform thorough flushing and check that there is no contamination. Cutting oil, rubber mold releasing agent, foreign objects etc. from the manufacturing line and cutting oil, foreign objects etc. from the pipeline may contaminate the liquid which is to be handled.
- Do not operate pumps with a specification of 50 Hz at 60 Hz. Damage may arise as a result of excess pressure or burnout of the motor etc. due to overload. Do not operate pumps with a specification of 60Hz at 50Hz. Pump performance may be reduced.
- Do not put the flammable items on the pump surroundings or inside the pump cover or control panel, or cover the pump, cable or control panel with the flammable items. Failure to observe this could overheat and result in burning.
- The Pump should never be disassembled, repaired, or modified, or the power cable should never be replaced by anyone other than a qualified repair technician. Improper repairs could result in electric shocks, fires, faults or break
- It is recommended that both periodic and daily inspections be performed in order to ensure that the pump will operate reliably for as long as possible. Failure to perform inspections may lead to pump failure, accidents etc. For periodic inspections, please consult your distributor or our nearest sales offices .

Specifications/configurations may be altered as a result of improvements. Unauthorized reproduction of this document is prohibited.
